THE WAR COMES TO JOHN BILLINGS, ESQUIRE

During its somewhat fusty existence of more than half a century since the bewhiskered days of the middle eighties, this Library has been getting in a vast amount of rather dull, but at the same time important, material coming under the head of Statistics. So solemn has been the procession arriving from all parts of the world that the fact some of it came addressed to John Billings, Esquire, even as late as three or four years back, caused not even the ripple of a smile. That Dr. Billings had not been in the Library in more than forty years and had gone to his honored rest some twenty-five years before, made no difference.

This mail came regularly from His Majesty's possessions everywhere, from Malaya, from India, from Ceylon, from Hong Kong, from British Borneo. It came also from Java, and from Celebes, and kept us informed regularly concerning matters of public health, rainfall, birth rates, and so on, in the far corners of the earth. One of the last of its generation came out of Batavia just as the Japanese raiders flew over the horizon and I suppose we shall see no more in many a long day.

We have one grim reminder, nevertheless, that a toe hold is still maintained in the Southwest Pacific (Southeast if you want to be exact), and that is, that letters are still coming to John Billings' place with kangaroo stamps in the right upper corner. Let us hope that the tiger of Malaya and the profile of Queen Wilhelmina will one day return to us.
